

20 July 1959

MEMORANDUM FOR: Director of Logistics

SUBJECT: NIS Printing Situation

1. I have just reviewed the NIS printing situation at the end of FY 1959 and find that a marked improvement has occurred during the year. The serious NIS backlog of material has been reduced to a proper working level and the average printing time per section has been lowered from 111 days prevailing in FY 1958 to 80 days during the last quarter of FY 1959.

2. This outstanding performance has enabled us to get NIS into the hands of users at least a month sooner than heretofore.

3. Please convey to the Chief, Printing Services Division, OL, and the staff of the Administration Building Plant my appreciation for this exceptionally fine job which has so materially benefited the NIS program.
